Community
Crunch
#8

Prologue

Today on 12.06.2021 at 18:00 o'clock took place our
meanwhile seventh community meeting took place in
Teamspeak.

- - - - -

In the last month some things have come up, which have
been were addressed and discussed in this regulars'
table.

- - - - -

This short, little "handout" is especially for those people
who were not able to participate at the time of the
Teamspeak conversation.
so that the information is not
withheld from you.

Special Snowflakes

We would like to welcome our Special Snowflakes from the Discord!
In this case, most of the admin team of the server "Sunny Side Gaming" (formerly Sunny Side of Ark) including the owner Bosshoss was present.

We have a special friendship to this server and support each other with words and deeds. Here we regularly exchange information, or just philosophize a little about god and the world.

Rule Overhaul

Rules have been revised a bit, later this week these revised rules will be fed in on all "platforms"!

Rule change in this case means that rules were simply described in more detail and better explained.

Furthermore we ask you to keep to our rules! We will issue more warnings and enforce consequences from now on.

Homepage/Discord Overhaul

In the next weeks the homepage will be completely overhauled and made clearer! Various new pages will be created with contents, which are currently only on Discord.

In Discord again some channels will disappear, so that everything doesn't look so crowded anymore.

Bossmap

The Galactic Warden is currently not accessible, because Wildcard has made changes, which our modders have to fix first. Since they are on vacation, we have to be patient for a while!

Genesis Part 2

It's been a week since we were able to download and play the DLC.
Nevertheless, Gen2 is still in its infancy.
There are still bugs and strange .ini settings everywhere.
Among them are for example:

- instant mating as soon as the Meawing Proach mission is done.
- Voidwyrms crash the client
- The Rockwell bossfight endscene crashes the Gen2 server

There is not much we as server operators can do about it, except to stay up to date and to add quick'n dirty workarounds from time to time!

RR-Homedeko Mod

Unfortunately we have to report that the Homedeko mod causes errors on several of our servers! These errors express themselves, as in the bases of some players so-called "Crashzones" have arisen. As soon as a player enters such a zone, the game crashes with a fatal error and you can't log in until the "corrupt" structure is removed. To our regret, the mod has over 500 items, and figuring out exactly which structure is corrupt is far beyond the scope of what is sustainable.

For this very reason, as soon as another such crashzone occurs, we will ban the mod from the entire cluster! Both on the Forever, as well as on the Season!

Postscript:

After the community crunch, deep in the night another crashzone has emerged on Crystal Isles! As a result, the mod will disappear from our server! But don't panic! YOU can now significantly co-determine which new "interior design mod" will come to the server! Send us for it in the #modvorschläge channel in Discord mods.

But here are a few prerequisites for it:

NO Eco Mod

they must not significantly disturb the performance

as few "producing" structures as possible

best would be a clean documentation of the mod

It should run stable

Feedback Channel

Since we had it again and again that the feedback channel is used as a basis for discussion, we will remove this, should you still have feedback, you can now address it to us via "Feedback Ticket"!

Epilogue

In this sense, the Valhalla team thanks you for the the lively attendance at our eighth regulars' table. It was a very interesting and informative evening.

Many thanks also to the Sunny Side Team, who also came in large numbers this time!

Sunny Side Gaming Discord

With best regards

Your

Team
